DAHLIAS

*"Ahl the shades of bronze and yellow,
Purple, lavender and rose,
In the evening light so mellow,
Ere night comes in soft repose.
Dahlias, orchid tinted dahlias,
Crimson, mauve, and snowy white,
Blooming valiantly, all summer,
'Til bent low by autumn's blight.*

*You're my garden's fairest treasure,
Giving of your beauty's store
Freely, gladly, without measure,
All I ask of you, and more.
Searching deep 'mid your soft petals,
Traces of God's hand I see,
And I bow in reverent wonder
At His gift of you to me."*

The lure of the modern Dahlia captures the fancy of a greater number of people than any other flower. It is the easiest of all flowers to cultivate and will produce more flowers than any other plant grown, also a marvelous assortment of colors all summer and fall.

CULTIVATION

Give the Dahlia an open, sunny space, away from tree roots, good drainage, normal rains, plenty of cultivation before blooming time, a bit of fertilizer when the buds appear, loose, loamy soil—not too rich; and with good tubers well selected varieties, you can grow the best Show Dahlias.

* * *

I guarantee my tubers to be true to name and shipped in good growing condition. I will replace a tuber, should it fail to sprout, after being properly planted, if same is returned to me with its tag three weeks after planting.

CAUTION

Care should be taken that the tubers are not allowed to dry out before planting. Should your ground not be prepared for immediate planting, on receipt of tubers, keep them wrapped and in a moist place until planted. The little eye, especially if sprouted, if exposed much to air and wind, will shrivel or die.

Cultural directions sent with each order.

TERMS CASH with each order. I pack and pay transportation. I never substitute unless requested to do so. A second choice is advisable.

Order early and avoid disappointment. On account of the general drought Dahlia stock is short. Delivery at planting time or at any stated time.
